

## FREE ENVIRONMENTAL TRAINING SESSION for small to medium sized businesses

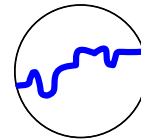

This session is ideal for anyone trying to manage their business' environmental impact through **both** hard and soft measures. Attendees will leave with a good understanding of how best to practically manage their own environmental impact.

As part of Global Action Plan's support programme, attendance at the workshop will be followed up with a visit from one of our expert consultants to your premises where they will explain how to put the learning into practical action and provide you with recommendations specific to your business. The consultant will build on this visit with a report and action plan and follow-up visits as you require them - to discuss your progress and calculate savings.

Thanks to European regional Development Funding this process **is entirely free** to small businesses in London.
