

## Renewable Energy and Carbon Footprinting Workshop

**Date:** Tuesday 7<sup>th</sup> September 2010  
**Time:** 9.30am to 12pm  
**Venue:** County Hall, Topsham Road, Exeter EX2 4QD

What renewable energy options are suitable for you? Find out the answer to this and much more, including what government funding opportunities are available, such as the Feed in Tariffs scheme. The workshop will also cover the importance of carbon footprinting and how to demonstrate best practice, including practical tips on how to become a low-carbon business.

### Agenda

09.30 Welcome and introductions

09.45 Renewable energy options and funding opportunities - Gareth Walton, REGEN SW  
Including:

- The legislative drivers for small scale renewables
- Government funding opportunities - Feed-in Tariffs & Renewable Heat Incentive
- The process of considering small scale renewables
- Small scale renewable energy technologies – key points
- The importance of the Microgeneration Certification Scheme (MSC)

10.15 Renewable energy case study – Fiona Sim, Calvert Trust

10.30 Break

10.45 Why carbon footprint? Tom Kennard, Global Action Plan  
Including:

- Carbon footprinting drivers, mechanisms, approaches and best practice
- Effective carbon footprinting communication
- Effective carbon management towards a low carbon economy

11.15 Practical carbon footprint exercise, incorporating carbon footprinting techniques

11.45 Carbon footprinting FAQs, covering common carbon footprinting queries & pitfalls

12.00 Close
